Subject: Authorization Granted: 5850-5895 MHz Emergency STA Request - Jordan Pruett of SRInternet, LLC
Attachments: Resound STA.pdf; SRInternet STA.pdf; STA Collier Fiber.pdf; STA WiFires.pdf; STA WiFires Adjusted.pdf

Mr. Pruett,

This email is being sent to SRInternet, LLC for the wireless Internet service providers which jointly filed a request on April 6, 2020 (and subsequently amended) for emergency Special Temporary Authorization ("STA") to operate in the 5850-5895 MHz band at the locations described in Attachments to that request and the subsequent addenda to the request. The applicants will be using the 5850-5895 MHz band to provide relief during the state-of-emergency caused by the spread of COVID-19 throughout the United States.

All four (4) of the individual applications for an emergency STA contained in that document are granted via this email. These are distinct grants and are for individual applicants; the Commission will treat each grant as independent from any others granted by this email, and each applicant is independently responsible for complying with the conditions of its grant. Applicants are advised that this includes ensuring proper protection of incumbents in the 5850-5895 MHz GHz band.

Each grant is for a period of 60 days, provided the relevant applicant individually files a complete FCC Form 601 application for an STA to continue its operations in the 5.8 GHz band within 10 days of today's date (April 14, 2020). If an applicant fails to file a complete FCC Form 601 application by this date, its STA will terminate at midnight on that date. Each applicant's use of the 5850-5895 MHz band is authorized on a secondary, non-interference basis and is limited by the conditions described below.

By utilizing the 5850-5895 MHz band pursuant to this STA, the applicant agrees to the following conditions:

- It understands that operations under this STA are subject to the general conditions of operation set forth in Section 15.5 of the Commission's rules (including that its access is non-exclusive and not subject to interference protection). STA recipients with overlapping grants must work together to resolve interference concerns.
- It is responsible for ensuring that it does not cause interference to existing licensees. It must review existing DSRC licenses in this band to determine any nationwide, statewide, or countywide licenses that cover or are adjacent to its service area, as well as any site licenses that are near that service area. It must then contact each of these affected licensees before beginning operation and provide its contact information so that the licensee can inform it of interference issues. It may then begin operation; it need not await a response or approval. If a complaint of interference cannot be timely resolved, operation under this STA must cease. It may not operate within 2 kilometers of any site license, regardless of notification or actual interference.
- It will operate consistent with the power levels in Section 15.407(a)(3) of the Commission's rules.
- It will attenuate emissions at 5895 MHz to a level of -27dBm or less.
- It understands that any emergency STA grant is conditioned on the applicant filing a formal STA application on FCC Form 601 (Radio Service Code QQ) within 10 days of emergency STA grant. As part of that filing, it must provide a phone number which connects directly to a person who is able to immediately resolve any interference concerns arising from its operations pursuant to this STA.

- Upon expiration of this STA, it will cease operating in the 5850-5895 MHz band and retune equipment to operate in compliance with the Commission's equipment certifications; it will confirm with the Bureau within 14 days of expiration that it has successfully retuned all of its devices to be compliant with Commission certifications.
- It understands that operations under this STA shall protect federal radiolocation services operating in the 5850-5895 MHz band and, to afford such protection, operations under this STA are prohibited within 75 kilometers of the locations listed in the table below and any additional sites specified by the Commission after initial grant.
- It understands that any structure utilized to operate pursuant to this STA must comply with the height limitations specified in Section 17.7 of the Commission's rules or must be registered with the FAA

The following are federal radiolocation services locations. Operations under this STA are not permitted within 75 kilometers of these locations:

Location	State	Latitude	Longitude
Ft. Rucker	AL	311947N	0854255W

Keith D. Harper
Associate Chief, Mobility Division
Wireless Telecommunications Bureau
Federal Communications Commission

SRInternet Networks, LLC
Request for Special Temporary Authority

Pursuant to Section 1.931(a)(2)(iv) of the Federal Communications Commission's ("FCC" or "Commission") Rules, 47 CFR § 1.931(a)(2)(iv), SRInternet Networks, LLC ("SRInternet") hereby requests Special Temporary Authority ("STA") to deploy and provide point-to-multipoint service in the following counties in Texas:

Texas

Fannin

Ward

SRInternet seeks use of the 5850-5895 MHz band on a temporary basis for a period of 60 days. Grant of an STA would be consistent with the Commission's March 26, 2020 grant of emergency STA to 33 fixed wireless broadband providers ("WISP STA") and will help SRInternet meet the surge in consumer demand for residential fixed broadband services during the COVID19 pandemic.

SRInternet is a fixed wireless internet service provider delivering voice and data services in rural areas of Texas to the residential, commercial, small business, education, healthcare and public sector markets. SRInternet relies primarily on unlicensed spectrum for lastmile connections to end users, including the 5 GHz U-NII bands. Many of SRInternet's customers have no other alternative to terrestrial broadband services.

As the COVID-19 has spread, federal and local governments have taken increasingly stronger steps to encourage "social distancing." These actions and warnings have resulted in more and more Americans working and learning from their homes, circumstances that are likely to continue for at least several weeks. Over the past few weeks, SRInternet has seen bandwidth usage increase by as much as 30-40 percent as more and more schools close and consumers practice "social distancing."

To meet this increase in demand and to ensure that students, consumers, farms and businesses can stay connected with adequate broadband, SRInternet requires access to additional spectrum. SRInternet currently uses the U-NII bands to deliver fixed broadband service. The U- NII-4 band (5850-5925 MHz) is shared with the Dedicated Short-Range Communications ("DSRC") service (Radio Codes IQ and QQ) and certain federal users.

Pursuant to Section 1.931(a)(2)(iv) of the FCC's Rules, the Commission may grant a request for STA upon a finding that there are extraordinary circumstances requiring operation in the public interest and that delay in the institution of such service would seriously prejudice the public interest.

SRInternet respectfully submits that grant of this request meets that standard and is in the public interest. Emergency use of the 45 megahertz in the 5850-5895 MHz band will be the best solution for helping to meet the increase in demand for fixed broadband services in the counties identified above. First, as noted above, many of SRInternet's customers have no other alternative to terrestrial broadband services. As COVID-19 has spread, federal and local governments in SRInternet's markets have taken increasingly stronger steps to encourage social distancing. These actions and warnings have resulted in more and more Americans working and learning from their homes, circumstances that are likely to continue for at least several weeks, resulting in a profound shift of broadband use to residences. Second, other unlicensed bands, such as U-NII-1 and U-NII-3, are too congested to meet the existing and expected surge in bandwidth demand, including the needs of first responders. Third, SRInternet has access to FCC-certified 5 GHz equipment that can be easily and quickly re-tuned via a software update to operate in the 5850- 5895 MHz band. Fourth, this re-tuned equipment will not require installations to customer locations in order for access to be enabled, thereby mitigating the health risks to consumers and installers that would be caused by close human contact in the home.

SRInternet also respectfully submits that delay in the institution of the operations requested herein would seriously prejudice the public interest. To meet the increase in demand and to ensure that students, consumers, farms and businesses can continue to stay connected with adequate broadband, SRInternet requires temporary access to this additional spectrum so it can increase throughput to its customers. SRInternet's proposed operations will not cause interference to other licensed operations.

Consistent with the WISP STA, SRInternet understands that the following conditions may apply to its STA:

- It understands that operations under this STA are subject to the general conditions of operation set forth in Section 15.5 of the Commission's rules
- It is responsible for ensuring that it does not cause interference to existing licensees. It must review existing DSRC licenses in this band to determine any nationwide, statewide, or countywide licenses that cover or are adjacent to its service area, as well as any site licenses that are near that service area. It must then contact each of these affected licensees before beginning operation and provide its contact information so that the licensee can inform it of interference issues. It may then begin operation; it need not await a response or approval. If a complaint of interference cannot be timely resolved, operation under this STA must cease. It may not operate within 2 kilometers of any site license, regardless of notification or actual interference.
- It will operate consistent with the power levels in Section 15.407(a)(3) of the Commission's rules.
- It will attenuate emissions at 5895 MHz to a level of -27dBm or less.

- Upon expiration of this STA, it will cease operating in the 5.8 GHz band and retune equipment to operate in compliance with the Commission's equipment certifications; it will confirm with the Bureau within 14 days of expiration that it has
- It understands that operations under this STA shall protect federal radiolocation services operating in the 5.8 GHz band and, to afford such protection, operations under this STA are prohibited within 75 kilometers of designated federal locations and any additional sites specified by the Commission after initial grant.
- It understands that any structure utilized to operate pursuant to this STA must comply with the height limitations specified in Section 17.7 of the Commission's rules or must be registered with the FAA.

Should the Commission have any questions or need additional information, please contact our counsel on this matter, Jordan Pruett, SRInternet, 501 N Main Ave, Monahans, TX 79756, T: 806-664-1451, E: jbp@srinternetllc.com.

Collier Fiber

Request for Special Temporary Authority

As required by the Commission's March 26, 2020 grant of STA to 33 fixed wireless Internet service providers ("WISP STA) and pursuant to Section 1.931(a)(2)(iv) of the Federal Communications Commission's ("FCC" or "Commission") Rules, 47 CFR § 1.931(a)(2)(iv), Collier Fiber Internet ("Collier Fiber") hereby requests Special Temporary Authority ("STA") to deploy and provide point-to-multipoint service in Collier, FL using the 5850-5895 MHz band on a temporary basis for a period of 60 days. Grant of an STA would be consistent with the WISP STA and will help Collier Fiber meet the surge in consumer demand for residential fixed broadband services during the COVID-19 pandemic.

Collier Fiber is a fixed wireless internet service provider delivering voice and data services in rural areas of Collier County Florida to the residential, commercial, small business, education, healthcare and public sector markets. Collier Fiber relies primarily on unlicensed spectrum for last-mile connections to end users, including the 5 GHz U-NII bands. Many of Collier Fiber's customers have no other alternative to terrestrial broadband services.

As the COVID-19 has spread, federal and local governments have taken increasingly stronger steps to encourage "social distancing." These actions and warnings have resulted in more and more Americans working and learning from their homes, circumstances that are likely to continue for at least several weeks. Over the past few weeks, Collier Fiber has seen bandwidth usage increase by as much as 30 to 40 percent as more and more schools close and consumers practice "social distancing."

To meet this increase in demand and to ensure that students, consumers, farms and businesses can stay connected with adequate broadband, Collier Fiber requires access to additional spectrum in Collier County Florida. Collier Fiber currently uses the U-NII bands to deliver fixed broadband service. The U-NII-4 band (5850-5925 MHz) is shared with the Dedicated Short-Range Communications ("DSRC") service (Radio Codes IQ and QQ) and certain federal users

Pursuant to Section 1.931(a)(2)(iv) of the FCC's Rules, the Commission may grant a request for STA upon a finding that there are extraordinary circumstances requiring operation in the public interest and that delay in the institution of such service would seriously prejudice the public interest.

Collier Fiber respectfully submits that grant of this request meets that standard and is in the public interest. Emergency use of the 45 megahertz in the 5850-5895 MHz band will be the best solution for helping to meet the increase in demand for fixed broadband services in Collier County, Florida. First, as noted above, many of Collier Fiber's customers have no other alternative to terrestrial broadband services. As COVID-19 has spread, federal and local governments in Collier Fiber's markets have taken increasingly stronger steps to encourage social distancing. These actions and warnings have resulted in more and more Americans working and learning from their homes, circumstances that are likely to continue for at least several weeks, resulting in a profound shift of broadband use to residences. Second, other unlicensed bands, such as U-NII-1 and U-NII-3, are too congested to meet the existing and expected surge in bandwidth demand, including the needs of first responders. Third, Collier Fiber has

access to FCC-certified 5 GHz equipment that can be easily and quickly re-tuned via a software update to operate in the 5850- 5895 MHz band. Fourth, this re-tuned equipment will not require installations to customer locations in order for access to be enabled, thereby mitigating the health risks to consumers and installers that would be caused by close human contact in the home.

Collier Fiber also respectfully submits that delay in the institution of the operations requested herein would seriously prejudice the public interest. To meet the increase in demand and to ensure that students, consumers, farms and businesses can continue to stay connected with adequate broadband, Collier Fiber requires temporary access to this additional spectrum so it can increase throughput to its customers. Collier Fiber's proposed operations will not cause interference to other licensed operations.

Collier Fiber acknowledges and accepts the conditions and limitations imposed by the WISP STA.

Should the Commission have any questions or need additional information, please contact our regulatory personnel on this matter, Jordan Pruett, SRInternet, 501 N Main Ave, Monahans, TX 79756, T: 806-664-1451, E: jbp@srinternetllc.com.

Resound Networks, LLC

Request for Special Temporary Authority

Pursuant to Section 1.931(a)(2)(iv) of the Federal Communications Commission's ("FCC" or "Commission") Rules, 47 CFR § 1.931(a)(2)(iv), Resound Networks, LLC ("Resound") hereby requests Special Temporary Authority ("STA") to deploy and provide point-to-multipoint service in the following counties in New Mexico and Texas:

New Mexico

Lea

Texas

Andrews

Dawson

Gaines

Gray

Hockley

Leon

Lubbock

Terry

Ward

Wheeler

Yoakum

Resound seeks use of the 5850-5895 MHz band on a temporary basis for a period of 60 days. Grant of an STA would be consistent with the Commission's March 26, 2020 grant of emergency STA to 33 fixed wireless broadband providers ("WISP STA") and will help Resound meet the surge in consumer demand for residential fixed broadband services during the COVID19 pandemic.

Resound is a fixed wireless internet service provider delivering voice and data services in rural areas of Texas and New Mexico to the residential, commercial, small business, education, healthcare and public sector markets. Resound relies primarily on unlicensed spectrum for lastmile connections to end users, including the 5 GHz U-NII bands. Many of Resound's customers have no other alternative to terrestrial broadband services.

As the COVID-19 has spread, federal and local governments have taken increasingly stronger steps to encourage "social distancing." These actions and warnings have resulted in more and more Americans working and learning from their homes, circumstances that are likely to continue for at least several weeks. Over the past few weeks, Resound has seen bandwidth usage increase by as much as 30-40 percent as more and more schools close and consumers practice "social distancing."

To meet this increase in demand and to ensure that students, consumers, farms and businesses can stay connected with adequate broadband, Resound requires access to additional spectrum. Resound currently uses the U-NII bands to deliver fixed broadband service. The U-NII-4 band (5850-5925 MHz) is shared with the Dedicated Short-Range Communications ("DSRC") service (Radio Codes IQ and QQ) and certain federal users.

Pursuant to Section 1.931(a)(2)(iv) of the FCC's Rules, the Commission may grant a request for STA upon a finding that there are extraordinary circumstances requiring operation in the public interest and that delay in the institution of such service would seriously prejudice the public interest.

Resound respectfully submits that grant of this request meets that standard and is in the public interest. Emergency use of the 45 megahertz in the 5850-5895 MHz band will be the best solution for helping to meet the increase in demand for fixed broadband services in the counties identified above. First, as noted above, many of Resound's customers have no other alternative to terrestrial broadband services. As COVID-19 has spread, federal and local governments in Resound's markets have taken increasingly stronger steps to encourage social distancing. These actions and warnings have resulted in more and more Americans working and learning from their homes, circumstances that are likely to continue for at least several weeks, resulting in a profound shift of broadband use to residences. Second, other unlicensed bands, such as U-NII-1 and U-NII-3, are too congested to meet the existing and expected surge in bandwidth demand, including the needs of first responders. Third, Resound has access to FCC-certified 5 GHz equipment that can be easily and quickly re-tuned via a software update to operate in the 5850- 5895 MHz band. Fourth, this re-tuned equipment will not require installations to customer locations in order for access to be enabled, thereby mitigating the health risks to consumers and installers that would be caused by close human contact in the home.

Resound also respectfully submits that delay in the institution of the operations requested herein would seriously prejudice the public interest. To meet the increase in demand and to ensure that students, consumers, farms and businesses can continue to stay connected with adequate broadband, Resound requires temporary access to this additional spectrum so it can increase throughput to its customers. Resound's proposed operations will not cause interference to other licensed operations.

Consistent with the WISP STA, Resound understands that the following conditions may apply to its STA:

- It understands that operations under this STA are subject to the general conditions of operation set forth in Section 15.5 of the Commission's rules
- It is responsible for ensuring that it does not cause interference to existing licensees. It must review existing DSRC licenses in this band to determine any nationwide, statewide, or countywide licenses that cover or are adjacent to its service area, as well as any site licenses that are near that service area. It must then contact each of these affected licensees before beginning operation and provide its contact information so that the licensee can inform it of interference issues. It may then begin operation; it need not await a response or approval. If a complaint of interference cannot be timely resolved, operation under this STA must cease. It may not operate within 2 kilometers of any site license, regardless of notification or actual interference.
- It will operate consistent with the power levels in Section 15.407(a)(3) of the Commission's rules.
- It will attenuate emissions at 5895 MHz to a level of -27dBm or less.

- It understands that operations under this STA shall protect federal radiolocation services operating in the 5.8 GHz band and, to afford such protection, operations under this STA are prohibited within 75 kilometers of designated federal locations and any additional sites specified by the Commission after initial grant.
- It understands that any structure utilized to operate pursuant to this STA must comply with the height limitations specified in Section 17.7 of the Commission's rules or must be registered with the FAA.

Should the Commission have any questions or need additional information, please contact our counsel on this matter, Stephen E. Coran, Lerman Senter PLLC, 2001 L Street, NW, Suite 400, Washington, DC 20036, T: 202-416-6744, E: scoran@lermansenter.com.

WiFires Internet

Request for Special Temporary Authority

As required by the Commission's March 26, 2020 grant of STA to 33 fixed wireless Internet service providers ("WISP STA) and pursuant to Section 1.931(a)(2)(iv) of the Federal Communications Commission's ("FCC" or "Commission") Rules, 47 CFR § 1.931(a)(2)(iv), WiFires Internet ("WiFires") hereby requests Special Temporary Authority ("STA") to deploy and provide point-to-multipoint service in Lamar County, Delta County, Red River and Fannin County, Texas, and Choctaw County Oklahoma using the 5850-5895 MHz band on a temporary basis for a period of 60 days. Grant of an STA would be consistent with the WISP STA and will help WiFires meet the surge in consumer demand for residential fixed broadband services during the COVID-19 pandemic.

WiFires is a fixed wireless internet service provider delivering voice and data services in rural areas of north eastern Texas and southern Oklahoma to the residential, commercial, small business, education, healthcare and public sector markets. WiFires relies primarily on unlicensed spectrum for last-mile connections to end users, including the 5 GHz U-NII bands. Many of WiFires's customers have no other alternative to terrestrial broadband services.

As the COVID-19 has spread, federal and local governments have taken increasingly stronger steps to encourage "social distancing." These actions and warnings have resulted in more and more Americans working and learning from their homes, circumstances that are likely to continue for at least several weeks. Over the past few weeks, WiFires has seen bandwidth usage increase by as much as 30 to 40 percent as more and more schools close and consumers practice "social distancing."

To meet this increase in demand and to ensure that students, consumers, farms and businesses can stay connected with adequate broadband, WiFires requires access to additional spectrum in Lamar County, Delta County, Red River and Fannin County, Texas, and Choctaw County Oklahoma WiFires currently uses the U-NII bands to deliver fixed broadband service. The U-NII-4 band (5850-5925 MHz) is shared with the Dedicated Short-Range Communications ("DSRC") service (Radio Codes IQ and QQ) and certain federal users

Pursuant to Section 1.931(a)(2)(iv) of the FCC's Rules, the Commission may grant a request for STA upon a finding that there are extraordinary circumstances requiring operation in the public interest and that delay in the institution of such service would seriously prejudice the public interest.

WiFires respectfully submits that grant of this request meets that standard and is in the public interest. Emergency use of the 45 megahertz in the 5850-5895 MHz band will be the best solution for helping to meet the increase in demand for fixed broadband services in Lamar County, Delta County, Red River and Fannin County, Texas, and Choctaw County Oklahoma. First, as noted above, many of WiFires's customers have no other alternative to terrestrial broadband services. As COVID-19 has spread, federal and local governments in WiFires's markets have taken increasingly stronger steps to encourage social distancing. These actions and warnings have resulted in more and more Americans working and learning from their homes, circumstances that are likely to continue for at least several weeks, resulting in a

profound shift of broadband use to residences. Second, other unlicensed bands, such as U-NII-1 and U-NII-3, are too congested to meet the existing and expected surge in bandwidth demand, including the needs of first responders. Third, WiFires has access to FCC-certified 5 GHz equipment that can be easily and quickly re-tuned via a software update to operate in the 5850- 5895 MHz band. Fourth, this re-tuned equipment will not require installations to customer locations in order for access to be enabled, thereby mitigating the health risks to consumers and installers that would be caused by close human contact in the home.

WiFires also respectfully submits that delay in the institution of the operations requested herein would seriously prejudice the public interest. To meet the increase in demand and to ensure that students, consumers, farms and businesses can continue to stay connected with adequate broadband, WiFires requires temporary access to this additional spectrum so it can increase throughput to its customers. WiFires's proposed operations will not cause interference to other licensed operations.

WiFires acknowledges and accepts the conditions and limitations imposed by the WISP STA.

Should the Commission have any questions or need additional information, please contact our regulatory personnel on this matter, Jordan Pruett, SRInternet, 501 N Main Ave, Monahans, TX 79756, T: 806-664-1451, E: jbp@srinternetllc.com.
